

<b>TECHNICAL SERVICES BULLETIN</b>	MY507A Tires Restricted To Drive & Trailer Use 425/65R22.5	5/15/07
------------------------------------	--	---------

### **New Part Number "50706" For the 425/65R22.5 MY507A**

In an effort to help assure correct application and service for MY507A tires, Yokohama has adopted two part numbers and tire branding to clearly define and distinguish tires for drive and trailer positions from those for steer positions or all positions.

#### **Tire Part Number:**

Our current part number **50752** is designed for steer and all position application.

The new part number **50706** is intended for drive and trailer position application only.

#### **Tire Branding:**

The drive and trailer position use "only" tire is branded "DRV TRL" in the branding box on the serial side sidewall. See branding image below.

The steer and all position use tires are not branded.

#### **Tire Service & Warranty:**

Our current part number (50752) may be applied to any position and is fully covered by all of the provisions of the Yokohama Standard Limited Warranty for Truck/Bus Tires.

The new drive and trailer use only tire part number (50706) should not be applied to steer positions. These tires are covered by the Yokohama Standard Limited Warranty for Truck/Bus Tires with the exception of tires submitted for ride disturbance allegedly caused by conditions such as imbalance, run out etc.
